**Date:** 9/22/2006 1:20:18 PM  
**Subject:** Hidden VALley Mine drill hole relocation

Pam/Steve/Joe

Attached please find a copy of the new locations of the two exploration drill holes (HV-06-06 and HV-06-07) that Consol wishes to relocate at our Hidden Valley mine, accompanied by a memo from Montgomery Archeology.

I have hard copies to insert or submit to the DOGM.  
I will call you to discuss.

The drilling contractor will mobilize next week.

Dear Ms. Grubaugh-Littig,

I am writing at the request of John Gefferth, Consol Energy, concerning the archaeological clearance for the relocation of two bore holes (HV-06-06 and HV-06-07) at the Hidden Valley Mine facility in Emery County, Utah. MOAC has conducted two inventories at the mine this year (U-06-MQ-0289p & U-06-MQ-290p). Based on my examination, both of newly proposed bore hole locations occur in areas that we originally inventoried (see the attached map). HV-06-06 is located within a 200 acre block inventory area (U-06-MQ-0298p). HV-06-07 has been relocated to the middle of the access route inventoried for the holes original location. Based on this examination, it does not appear that any additional inventory is warranted. However, HV-06-06 still occurs in close proximity to site 42Em3600. The original recommendation that the site boundary be flagged for avoidance purposes should still be followed.

If you have any questions, or require additional information, please feel free to contact me at your convenience.

Kindest regards,

Jody J. Patterson
